38 people from 7 countries attended our regular two-week course on Arches, Vaults and Domes from 19th June to 2nd July:
29 Indians, 1 Korean, 1 Ethiopian, 3 Americans, 1 Spanish, 1 Portuguese and 2 French

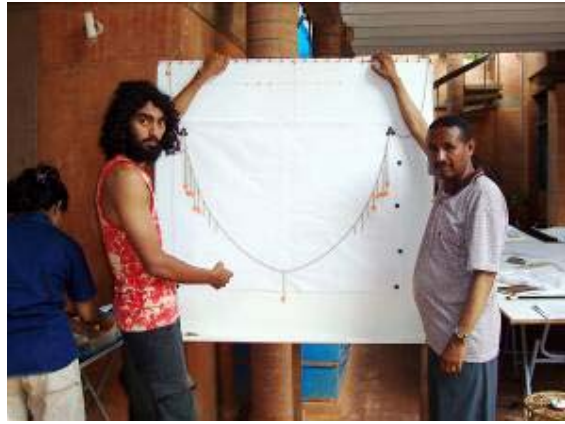

The first week was theoretical and trainees learned all basics of AVD. They calculated the stability of various types and shapes of arches. Trainees learnt also how to optimize arches with the method developed by the Auroville Earth Institute.

The second week was for building various types of arches, several vaults and domes with the Free Spanning Technique developed by the Auroville Earth Institute.

THEORETICAL COURSE AND STABILITY STUDY

BUILDING ARCHES, VAULTS AND DOMES
