

SERVICES

SOIL TESTING FOR CSEB

One litre of soil is required for sensitive analysis. Don't forget to mention all needed information with the sample: reference no., sampling depth, sampling conditions, etc. Never take topsoil with the sample: it must be removed.

CONSULTANCY

- Extra training courses on production and masonry of CSEB and earth construction (conducted at Auroville)
These training courses will be held in the Auroville Earth Institute and a minimum of twelve trainees per course is compulsory. The fees will be studied to suit each case.
