13:00 – 16:45

17:00

Theoretical session in Kuni Doni restaurant

KUNI DONI RESTAURANT, Salida a Celaya #24.

Introducción

In the Classroom - Coffee and Introductions

How to Build a Compressed Earth Block (CEB)

Building - Foundation through Bond Beam. The partners of Tierra y Cal present the step-by-step sequence using the manual you will have received.

Lunch break

Depart to Atotonilco

Soil selection and block manufacturing and lime stabilization. You will have the opportunity to press and test some blocks (bring 5 gallons of your dirt if you wish), and help to operate a pressing machine.

Meeting in Kuni Doni Restaurant and depart to Atotonilco

Hands-on construction of a small CEB building. The class will learn to build a wall to the speed lead and string and construct an arch using blocks pressed on the site. We'll place door and window bucks and set in an electrical circuit with a few plug boxes as we build the wall.

Lunch break.

Construction continues.

Meeting in Kuni Doni Restaurant and depart to Atotonilco

Focus on lime and clay plasters.

Lunch Break

Plaster continues.

Q. and A. Certificates of Completion handed out.
